

The "How-To" Guide for Creating an Intellimation within IntelliTools Classroom Suite

Created by: Erinn Dobres & Catherine Hunter InterACT 11/06/07

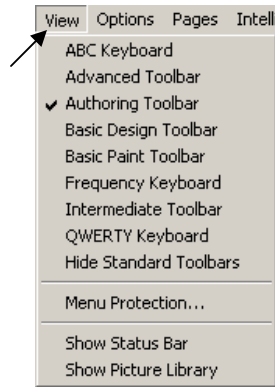

Target Document: Blank IntelliPics Studio 3 Document

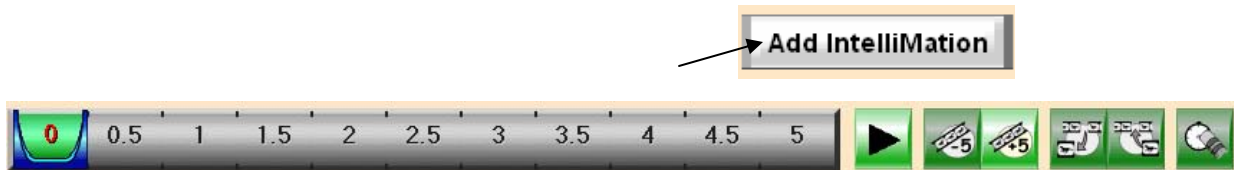

New IntelliPics Studio 3

Directions:

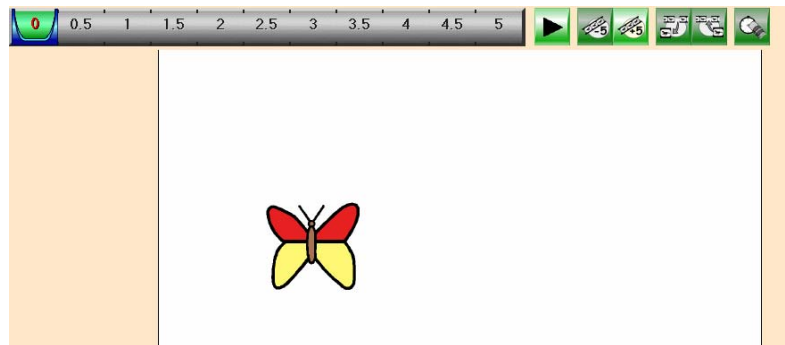

- 1) Open a blank IntelliPics Studio 3 document. Once the blank document opens, you should see an "Authoring Toolbar" visible at the top of the screen. If you do not see the authoring toolbar onscreen, click on "View" in the toolbar at the top of the screen and scroll down to and select "Authoring Toolbar". Once this is selected, the toolbar should appear at the top of the screen.

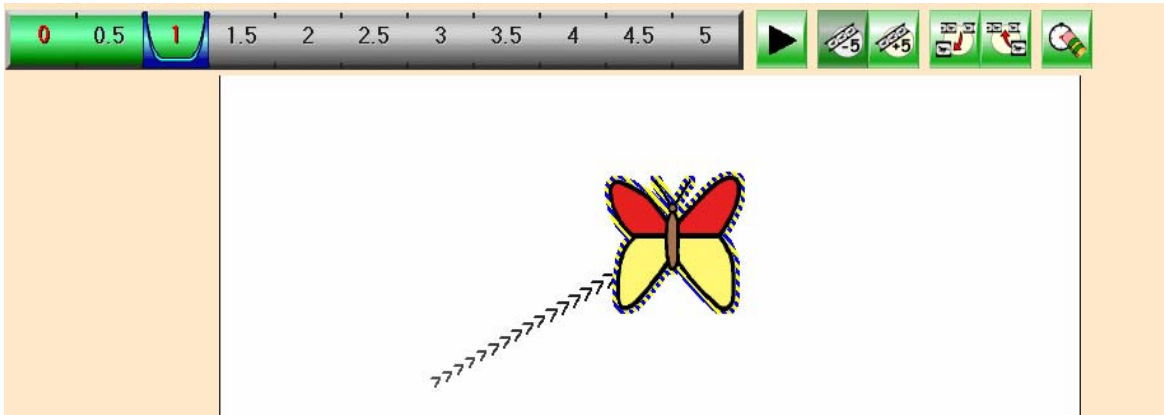

- 2) Next, click on the button labeled "Add Intellimation" to display the Intellimation timeline.

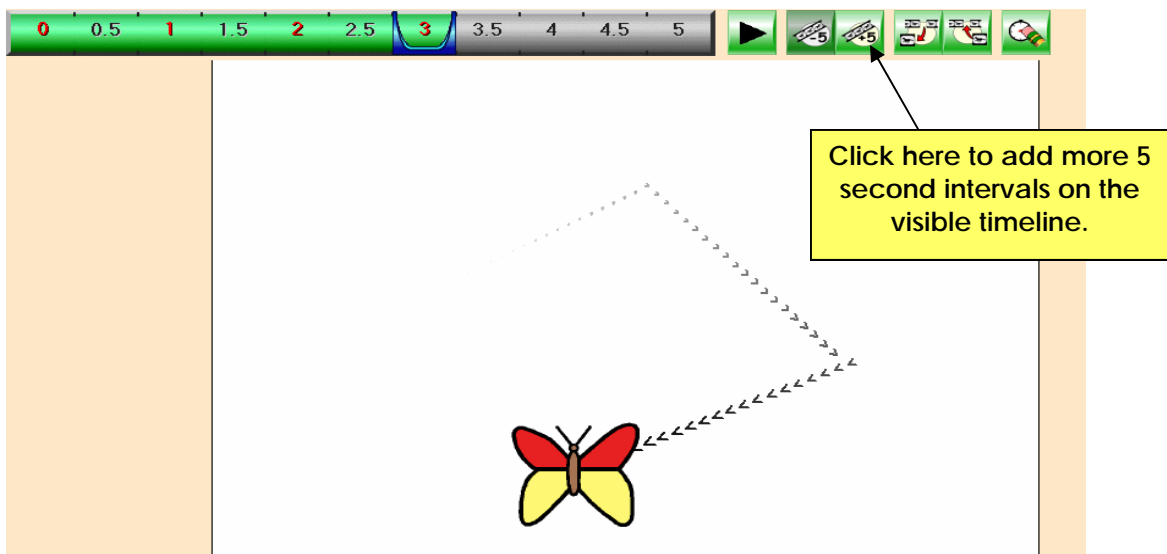

- 3) Next, insert a picture onto the screen by clicking on "Edit" in the toolbar at the top of the screen and scrolling down to and selecting "Insert Picture from Library". Then search for a picture from the "Picture Library" dialog box. Once a desired picture is located, click "Insert" at the bottom of the dialog box and your picture should appear onscreen.

- 4) Position your newly inserted picture on the page to a desired location in which you want your IntelliMation to begin. Next, click on a desired amount of time (in seconds) within the timeline for the first motion within your IntelliMation. Then drag your picture across the page to the next desired position within the IntelliMation. You will notice a path following your picture. This signals the first path within the IntelliMation.

- 5) Continue clicking on desired intervals of time within the timeline toolbar and moving your picture to desired locations. You will notice the path continues to follow your movements onscreen. The timeline shows 5 second intervals at a time onscreen. If you need to add more time to your timeline, click on the button depicting an IntelliMation and +5. This will display another 5 second interval timeline.

- 6) Once, you've completed your IntelliMation, click the "Play" button to view your newly created IntelliMation. Way to go! You've successfully created an IntelliMation!

* To utilize your IntelliMation within an activity, you will need to assign the action, "Play IntelliMation" to either a button or a page. Have fun!
